

# THE PATH TO EMISSION NEUTRALITY

Key areas of strategic development of the  
ORLEN Unipetrol Group until 2030

**Decarbonization**

**Reducing energy intensity**

**Emphasis on renewables**

**Plastics recycling**

**Advanced biofuels**

By 2030,  
we will invest over CZK

**30 billion**

in green projects.

**Refining**  
circular economy

The volume of advanced biofuels  
will reach 0.2 million tons  
per year.

**Petrochemicals**  
recycled plastics

15% of production will be made  
from recycled plastic waste.

**Energy**  
decarbonization of  
production

We are gradually replacing  
coal-fired heating plants with  
new steam-gas units.

**Retail**  
high share of alternative  
fuels

In addition to standard fuels, we  
also offer CNG, LPG, electric  
power and now also **hydrogen**,  
for which we are building  
infrastructure.

**Hydrogen**  
the fuel of now

By 2030, we plan to equip 54  
service stations in the Czech  
Republic and Slovakia with  
hydrogen dispensers and build 3  
hydrogen distribution centers.
